OBJECTIVE

Computer Science (Data Science) student skilled in Java, SQL, Excel, Power BI, Tableau and problem-solving. Familiar with Generative AI tools. Passionate about transforming data into meaningful insights through visualization, predictive modeling, and analytical problem-solving. Eager to apply technical and analytical skills to support data-driven decision-making while continuously enhancing professional skills.

EDUCATION

Sasi Institute of Technology & Engineering , Tadepalligudem, A.P., India	2026
CSE - Data Science; GPA: 8.75	
Sri Chaitanya Junior College , Rajahmundry, A.P., India	2022
Inter - MPC; GPA: 7.21	
Narayana Olympiad School , Rajahmundry, A.P., India	2020
SSC; GPA: 9.9	

SKILLS

Programming Languages	JAVA
Web / Frontend	HTML, CSS, JAVA SCRIPT
Databases	SQL
Tools	GitHub
Data & Analytics	Power BI , MS Excel , Tableau , Power Point
Core CS	DBMS, OOP Concepts
Soft Skills	Communication, Team Collaboration, Time Management

INTERNSHIPS

Data Analytics with Tableau Intern(Remote)	Aug 2025
Smart Bridge , Tools Used: Tableau, SQL	
• Developed interactive Tableau dashboards to visualize key performance indicators for enhanced data analysis.	
• Assisted in data cleaning and preparation to ensure high-quality dataset for analysis.	
Data Science Intern(Remote)	Jun 2025
Nyera , Tools Used: Python, Pandas, Matplotlib, Scikit-Learn	
• Analyzed datasets using statistical methods to identify trends and support data-driven decision-making.	
Machine Learning Intern (Remote)	Jul 2024
SkillDzire , Tools Used: Python, Scikit-Learn	
• Applied ML techniques to solve practical problems.	

PROJECTS

Browser History Simulator.

Tech: Java, LinkedList, ListIterator, Java Collections Framework.

Developed a console-based Browser History Simulator with Visit, Back, Forward, and Current Page operations. Used LinkedList and ListIterator for browser history management and navigation.

URL Threat Detection for Smartphones using Hybrid ML and DL.

Tech: Python, HTML, CSS.

Developed a hybrid ML/DL model to detect malicious and phishing URLs using feature extraction, preprocessing, and predictive threat analysis.

Heart Disease Prediction Dashboard.

Tech: Power BI, Python, Excel.

Built an interactive Power BI dashboard to analyze key heart disease risk factors and patient health metrics.

Quote Generator Web App.

Tech: HTML, CSS, JavaScript.

Developed a dynamic quote generator web application to fetch and display quotes in real time.

CERTIFICATIONS

- **MongoDB Basics** – MongoDB, 2025
- **Python for Data Science** – NPTEL, 2025
- **Data Analytics Essentials** – Cisco, 2025
